

Institutional Distinctiveness

Vision of the Institution is to bring an overall improvement in the society by imparting quality of higher education (value based and skill based education) and makes our students responsible, knowledgeable and competent citizens of society. With this view our College has its own mission which is distinctive and exceptional. The College has a diverse demographic set up where in the girl students are almost equal to boy's students. The College considers them an asset which has made the institution to bring holistic development. Most of the students are from rural areas and economically poor background. In this context, education of girl's is a challenge in these remote areas. There are prevailing other barriers like early marriage, unacceptable customs, social prejudices, gender stereotype that often hindrance the academic journey of girl students. Poor families often prefer boys when investing in education. Being a co-educational institution, our College has set distinctive approach to identify their talents and encourage them to bring the girl students into main stream of higher education by breaking all the odds prevailing in the way of academic excellence. The College gives exposure to the girl students to get an opportunity to participate in every curricular and extra-curricular activity very effectively.

Institutional Distinctiveness is very important for the all-round development of the Institution. Our aim is to mould and empower the students in the pursuit of knowledge, values and social responsibility and help them achieve excellence in different fields. Our College has a large number of students coming from surrounding villages. The numbers of girl students are quite remarkable. Our College staff tries to identify their talents and encourage them to achieve their goals. Although our students are economically poor, but they are not poor in talent, we try to encourage them to focus their lives in different fields and thereby to help them to face the global challenges. Therefore, the College gives exposure to the girl students to get an opportunity to participate in the curricular and extra- curricular activities very effectively.

On the occasion of International Women's Day programs are organized where women-related issues are discussed. Through these programmes women are given ideas and knowledge about different issues related to them. Again women Cell also takes initiatives regarding the health and hygiene of the girl students. Sanitary napkins are distributed among them to make them aware towards health and hygiene. A sound mind resides in a sound body. So a sound health is necessary to fulfill one's vision in life. Again for safety and security of women legal awareness are arranged. This type of conducive atmosphere in the College has been continuously helping the girl's students to develop their innate qualities and getting opportunities to be self-reliant. Likewise, some of our girl students are able to bring glory to our College through their performance in different fields. One among them named Rishikanya Kashyap made India Book of book of Records for her innovative work which is done in hand embroidery where twelve great personalities are elevated. Cracking the State level exam in police department some girls' students got appointed recently. Again in case of Higher education Shilpi Rani Hazarika achieved rank in B.A final exam of Dibrugarh University. The girl students take participation in cultural programmes organized by our College.

Institutional distinctiveness reflects the campaign of Govt. of India, 'Beti Bachao Beti Padhao' to educate the girl students helping them to study in higher education. In this regard, most of girl students come from tea garden community and down trodden area and it is too difficult to make them understand about importance of higher education as well their guardian. They prefer getting married to get admission in higher education. After the completion of secondary education both girl students and parents are not interested for higher education. For them secondary education completion means academic education finished. Some of them even do not know about higher education. To make them conscious about the benefit of higher education, Melamora College takes initiative to aware them about it. Through the counseling in adopted village the institution emphasizes the importance of higher education. The College has planned to adopt more villages in near future so that the ignorance could be vanished from their minds. In this away the campaign of Indian Govt. comes true through initiative taken by the institution.

The College organizes the women empowerment programs for making them confident enough to struggle the battle of life. Women Cell is very active in this regard. Various eminent women personalities are invited for the guidance on social issues on the occasion of International Women's Day. Health and hygiene programs are organized. Anti-sexual harassment Committee and Internal Complain Committee have been keeping a strong eye regarding the protection of girl students. There are no such cases recorded till date. Individual counseling has been provided by the faculty members to change the mindset of the parents. Yoga camps are organized to increase the concentration level of the students. The College encourages them to participate in extension activities to create the sense of social responsibility. CCTV cameras have been installed in the College premises. Separate toilet and Common room are provided to Girl's students. Equal opportunities are given to participate in Student's union body. Membership of women Cell and ICC Committee is provided. This type of conducive atmosphere in the College has been continuously helping the girl students to develop their personalities and getting opportunities to be self-reliant and resilient. The result is reflected in performances of girls' students in academic as well as extra-curricular aspects in the succeeding years.

India Book of records- Rishikanya Kashyap

Best graduate- Bichitra Saikia

Rank holder- Shilpi Rani Hazarika

Best athlete- Sujita Mura

Best artist- Najmin Sultana

As our special focus is to empower the girl students, so our College tries to make them bold and self-dependent, so that they can lead a society. Education of girls is given priority and they are helped in achieving higher education. They are financially supported by the College. An educated girl can lead and support a family well which would help to develop a society as well. Our College always maintains gender equality and in curricular and extra- curricular activities. Girls are given equal rights as boys. In student union election also it is reflected as well. Again the safety and security of girl students inside the campus are maintained. All facilities including separate girls' Common room with potable drinking water, separate toilet, thinking for health and hygiene of the girls are given priority. At allow feel pride regarding the performance of our girl students in other area besides education. They are honoured for their innovative activities. Their hidden talent is found out and we wish their bright future ahead.
