Colours are the Smiles of Nature'

As we all know that how beautiful our nature is and the more beautiful thing is to explore it. The Assam's Kaziranga fauna landscape has definitely got a new picture with the introduction of the Kaziranga Orchid and Biodiversity Park. The Kaziranga Orchid National park is an abode of more than 600 species of wild Orchids collected from all across the north-east India region. With our students we went to visit The Orchid park to see variety of different species of flowers and other plants which is worth watching. The Orchid and Biodiversity Park is largest Orchid Park in India and is the only Bamboo Park in North East India

Principal
Melamora College
Melamora, Golagha:

We enjoyed a lot in the park exploring varieties of flowers and cactus and clicked many pictures to keep a memory of this beautiful journey. All our students were happy to visit such a nice place and then we entered the museum where different types of handicrafts were placed which were made by bamboo with other handloom items and thier were various items of Ahom kingdom which were fascinating to watch. Along with these cultural programs were going on in the stage that is in between the orchid where cultural programmes like folk dance, bihu dance, bamboo dance were performed some of our students joined with them and danced happily. The journey was fulfilling , all the students enjoyed a lot and learned new things. With this our journey came to an end. Such initiatives must be taken for students knowledge as we all know nature gives us lessons which are not found in books.
